Today we invite you to talk

- Conversation is a space for desirable and undesirable futures
- Our challenge is to think together, and engage with a diversity of perspectives and proposals
- We want to have a safe place for everyone, in which respect is the center of the conversation
- In this way, don't judge other's ideas or attribute bad intentions when it could be a lack of knowledge or experience

Description

The extraction of raw materials in Latin American countries increased from about 100 million tonnes in 1970 to about 8300 million tonnes in 2009. This increase is significant for metal ores. The mining conflicts features conflicts related to metal ores, industrial minerals and other activities. Metal ores present the largest number of rep

Make notes of everything

Let's start!

Are (anti)futures
for Everyone?

What kind of
(anti)futures can
we imagine for
Latin America?

How could we (on ASU) innovate to support or avoid these (anti)futures?
