

**What geographic and temporal contexts characterize this STS innovation?**

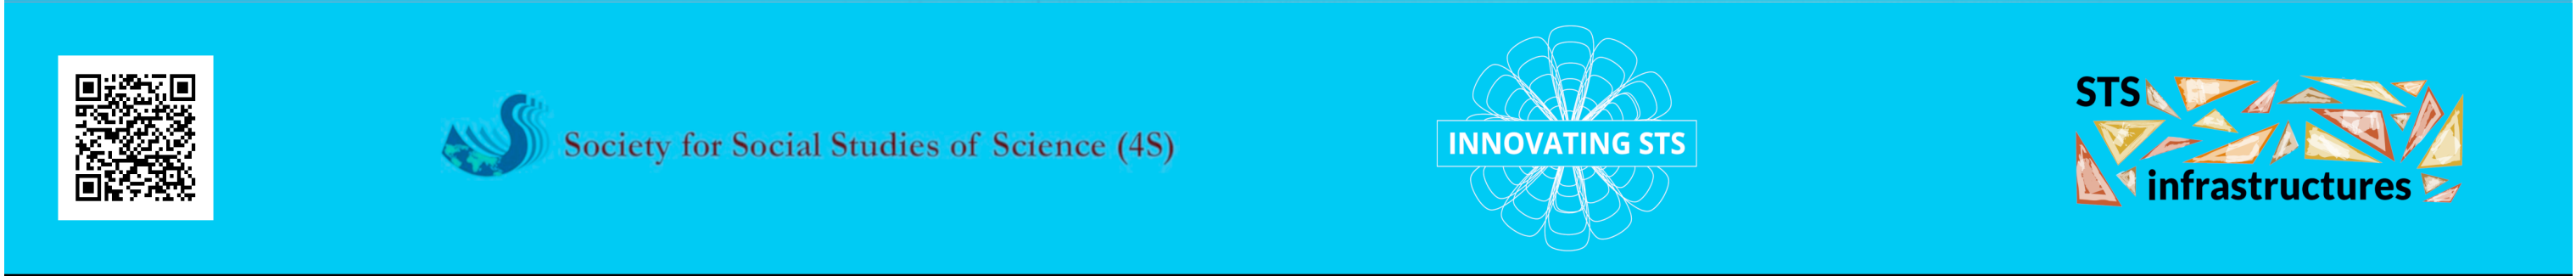

No one expected in 2014 that Arthur would be our ambassador to Brazil. His work on animal subjectivity and nature came after the call of the first conference, and the love for Chile (and a Chilean colleague), have him traveling from the gigantic Brazil to the Andean perisphere of Chile several times a year, collaborating with several members of the net. A similar history of transitions has Cecilia, specializing in governance of socio-environmental systems, has been found between Sussex and Santiago at various times. Both not only change location, but multiply, intellectually, emotionally and humanly in their contributions to our network. Participation, commitment and passion has no temporo-spatial barriers. Although the notion of Center-periphery is central to the Latin American tradition of CTS, the ambivalence of globalization and the anthropocene forces us to face a multiplicity of simulacry centers and peripheries. These constellations cannot be mapped by GoogleMaps or traversed in Uber, if not what measures in love, as the initial song of the musical RENT says. Five hundred twenty-five thousand six hundred minutes Five hundred twenty-five thousand moments so dear Five hundred twenty-five thousand six hundred minutes How do you measure, measure a year? In daylights, in sunsets In midnights, in cups of coffee In inches, in miles In laughter, in strife In five hundred twenty-five thousand six hundred minutes How do you measure a year in the life

**Innovations, Interruptions, Regenerations**

**Becoming an STS Thinker**

Sanhueza, Nicolás, Martin Andrés Perez Comisso, and Gloria Baigorrotegui. 2019. "Innovations, Interruptions, Regenerations." In Mestizo Knowledge: Mixing Identities from/above the Existence of Chilean STS, created by Nicolás Sanhueza, Martin Andrés Perez Comisso, and Gloria Baigorrotegui. In Innovating STS Gallery Exhibit, curated by Aalok Khandekar and Kim Fortun. Annual Meeting of the Society for Social Studies of Science. New Orleans, USA, Sept 5. <https://stsinfrastructures.org/content/innovating-sts/essay>.
